

Total Orders	Orders per Month	Order per Day	Orders Per Quarter
21,350	1,779.2	59.64	5,337.5

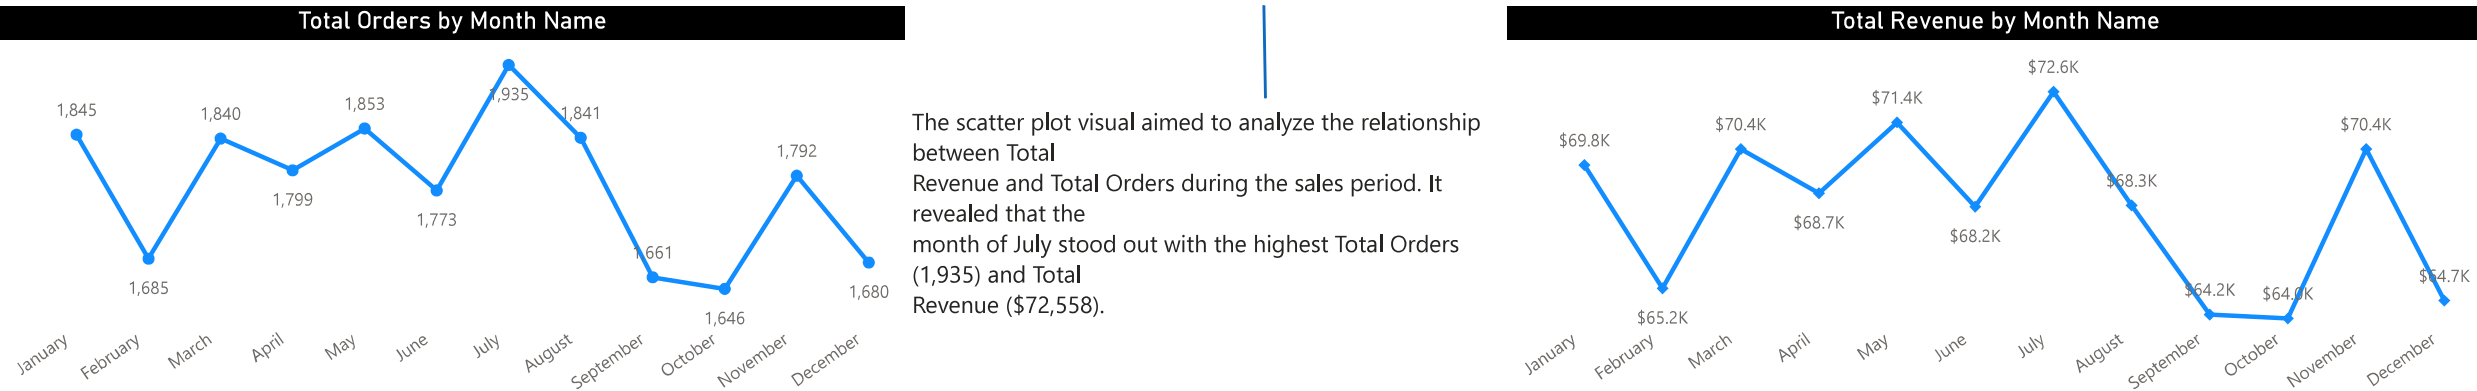

This visualization indicates that Quarter 3 had the **highest number** of Total Orders compared to the other quarters, with Quarter 2, Quarter 1, and Quarter 4 following in descending order. Quarter 3 had a Total Order count of 5,537, representing approximately 25.5% of the overall Total Orders. On the other hand, Quarter 4 had the lowest Total Orders recorded with a count of 5 118

Based on the visualization, it is evident that Friday had the highest number of orders compared to other days of the week. Additionally, the same day tends to be busier as customers place more orders during the weekend. Friday accounted for 16.57% of the total orders. Across all seven days of the week, the total orders ranged from 2,624 to 3,538.

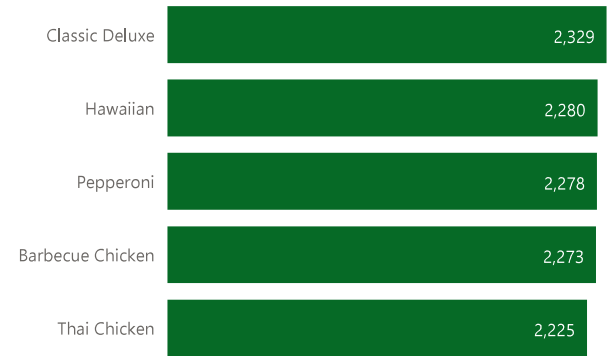

The month of **July** saw an increase in orders, which can be attributed to the summer season when people engage in more outdoor activities and spend quality time with family and friends, often participating in picnics and gatherings.

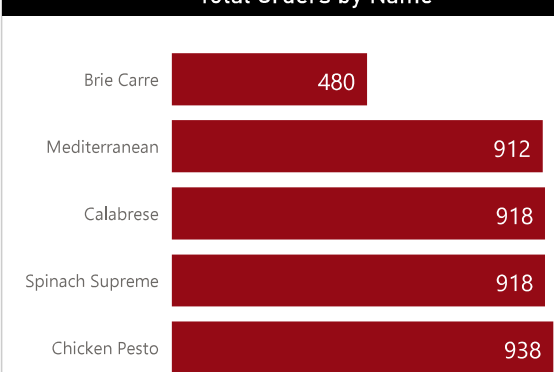

The scatter plot visual aimed to analyze the relationship between Total Revenue and Total Orders during the sales period. It revealed that the month of July stood out with the highest Total Orders (1,935) and Total Revenue (\$72,558).
